## Bel-Art® – SP Scienceware® Safety Cutter Catalog No. F21012-0000

The Bel-Art – SP Scienceware Safety Cutter cuts perfect lines in LabMat™ and will also quickly cut open rigid plastic “clamshell” packaging, shrink-wrap, and other hard to open plastic packaging.

### To Use:

Hold the Bel-Art – SP Scienceware Safety Cutter between your thumb and fore finger. Make sure the bottom edge of the cutter is in direct contact with the surface and that the body of the cutter is perpendicular to the surface (cutter will not work if held at an angle). Then simply drag the cutter along the length of the item being cut while applying slight downward pressure. When cutting on hard surfaces always use a protective barrier to avoid scratching surfaces.

661 Route 23 South, Wayne, NJ 07470
